REVIAN RAVIL ATHALA

FRONTEND ENGINEER

Indonesia East Java Surabaya | revianravilathala@gmail.com | +62-8311-5832-691

Motivated and detail-oriented Frontend Developer with a strong background in React.js, Tailwind CSS, and TypeScript, combined with solid experience in system administration, network engineering, and security compliance. Passionate about creating clean, responsive, and user-friendly web interfaces, while also bringing deep technical understanding of infrastructure, cloud environments, and cybersecurity standards like PCIDSS and ISO 27001. Proven ability to collaborate in cross-functional teams, adapt quickly, and deliver high-quality results in fast-paced environments.

PROFESSIONAL EXPERIENCE

Frontend Engineer   **Feb 2022 - Present**

- Developed responsive and high-performance web applications for the travel and fintech industries.
- Built reusable UI components and implemented modern UI/UX designs using Figma as reference.
- Collaborated with cross-functional teams to integrate REST APIs and improve frontend scalability.
- Ensured mobile-first and accessible design principles across all platforms.
- Tech Stack: Angular, TypeScript, Tailwind CSS, REST API, Git, GitHub, Figma

Frontend Engineer   **May 2021 - Jan 2022**

- Designed and developed frontend applications for POS and cashier systems, improving transaction efficiency and user experience.
- Focused on building intuitive, easy-to-use interfaces using React.js and Bootstrap.
- Integrated with RESTful APIs and managed version control through Git workflows.
- Tech Stack: React.js, Bootstrap, JavaScript, REST API, Git, GitHub, Figma

Frontend Dev Internship at Diskominfo Jatim Surabaya   **Mar 2019 - Sep 2019**

- Contribute to the development of React.js-based web interfaces for internal government applications, including monitoring dashboards and public information systems.
- Implement UI/UX designs using Tailwind CSS and TypeScript, with a focus on responsiveness and accessibility.
- Work closely with the backend team in integrating REST APIs, as well as handling debugging and optimizing application performance.
- Use Git and GitHub for team collaboration and source code management with efficient workflow.
- Tech Stack: Laravel, Tailwind CSS, REST API, Git, GitHub, Figma
